

SELF ADHESIVE EMBROIDERY BACKING - TEAR AWAY

Small embroideries and monograms become child's play with the self-adhesive embroidery backing Filmoplast. Can easily be removed without leaving residue. Also suitable for creating collages.

FILMOPLAST

Application areas

For mounting and embroidering small parts in an embroidery hoop, for machine embroidery, for framing embroidered pictures and for making collages. Suitable for all fabrics.

How To:

1. Mount in an embroidery frame with the masking paper facing up.
2. Carefully score the masking paper with a needle without damaging the nonwoven fabrics. Remove the scored area.
3. Position the fabric, smooth it out and start embroidering. Tear off the Filmoplast from the back.

Advantages

- Perfect for working on pieces that are smaller than the embroidery frame
- Pucker-free embroidery
- No slippage
