

WATER-SOLUBLE EMBROIDERY BACKING

Water soluble (25-30°C) embroidery backing for all machine embroideries and new creative works like crashing or “Crazy-Technique”

SOLUFLEECE

Application areas

For all kinds of machine embroidery, new creative techniques and as an ideal sewing aid for mini-quilts. Suitable for all fabrics and textile materials that are washable and sewable.

How To:

1. Lay the Solufleece under the fabric and secure in an embroidery frame.
2. Embroider your desired motif.
3. After you finish the embroidery, simply wash out the Solufleece.

Important: Do not iron or tear out!

Advantages

- Backing material for all machine embroidery methods
- Can be washed out without leaving a trace – even with cold water
- Excellent stabilising properties
- Versatile in application, e.g. for free lace embroidery, appliqués and other motifs
- For creating collages using the “pizza” and “thread” methods
